For those wishing to take photographs of graduates receiving their diplomas, we request that you do so only in the area designated for this purpose located just to the left of the stage. To reach this area, please walk around the outside of the tent, where ushers and security officers will assist you. Do not walk in the three center aisles as these are needed for the graduates. We appreciate your cooperation.

THE JOHNS HOPKINS SOCIETY OF SCHOLARS

The Johns Hopkins Society of Scholars was created on the recommendation of President Milton S. Eisenhower and approved by the University Board of Trustees on May 1, 1967. The society—the first of its kind in the nation—inducts former postdoctoral fellows and junior or visiting faculty at Johns Hopkins who have gained marked distinction in their fields of physical, biological, medical, social, or engineering sciences, or the humanities, and for whom at least five years have elapsed since their Hopkins affiliation. The Committee of the Johns Hopkins Society of Scholars, whose members are equally distributed among the academic divisions, elects the scholars from the candidates nominated by the academic divisions having programs for postdoctoral fellows. The scholars are invested at the time of Commencement, Commemoration Day, or a similar occasion. At that time, they are presented with a diploma and with a medallion on a black and gold ribbon, to be worn with their academic costumes.

The following listing of the Society of Scholars members is accompanied by a short description of their accomplishments at the time of election to the society.

Dr. Gabriel Alvarez
Madrid, Spain

Dr. Alvarez, professor in the Department of Theoretical Physics at the Universidad Complutense, is one of the brightest young scientists in Spain. In addition to contributions in quantum chemistry, mathematical physics and electron paramagnetic resonance, he has established a reputation in computer programming with his work on optical character recognition and the Spanish implementation of the NeXT operating system.

Dr. Frank C. Arnett Jr.
Houston, Texas

Dr. Arnett is internationally recognized as a leader in the field of immunogenetics. His research of autoantibody responses in various rheumatic diseases has played a significant role in identifying immune response alleles in human chromosomes. Dr. Arnett is director of the Division of Rheumatology and a professor of internal medicine at the University of Texas-Houston Health Science Center.

Dr. Subhash Chandra Basu
Notre Dame, Indiana

Dr. Basu has pioneered study of the biosynthesis of complex carbohydrates called gangliosides. These compounds accumulate in large quantity in certain diseases, such as Tay-Sachs', and are also involved in intercellular communication. The pathway of synthesis of the gangliosides, developed largely by Dr. Basu, is of major interest to researchers. He is chairman of the Biochemistry, Biophysics, and Molecular Biology Program and a professor of chemistry and biochemistry at the University of Notre Dame.

Dr. Nicolaie D. Cristescu
Gainesville, Florida

Dr. Cristescu is a leading researcher in the fields of dynamic plasticity, rock mechanics, and metal forming. His 1967 book, *Dynamic Plasticity*, based on extensive theoretical analyses, helped establish his international reputation. Dr. Cristescu served as president of the University of Bucharest from 1990 to 1992, and is a graduate research professor in the Department of Aerospace Engineering, Mechanics, and Engineering Science at the University of Florida.

Dr. Robert H. Fletcher
Boston, Massachusetts

Dr. Fletcher, professor of ambulatory care and prevention at the Harvard Medical School and Harvard Community Health Plan, is internationally recognized for his contributions to primary care. From 1990 to 1993, he served as editor of the *Annals of Internal Medicine*, shaping the editorial policy during a time of rapid changes in medicine and primary care. Dr. Fletcher is the former president of the Society of General Internal Medicine.

Dr. Ruth Gallily
Jerusalem, Israel

Dr. Gallily, professor of immunology at The Hebrew University - Hadassah Medical School Jerusalem and The Lautenberg Center of General and Tumor Immunology, has extensively studied the role of macrophages, cells that help protect against infection. She developed an antimacrophage serum, which showed the critical role of macrophages in inflammation, transplantation immunity, and autoimmunity. Dr. Gallily documented the interaction of antibody and macrophage in promoting the toxicity and destructive nature of cells.

Dr. Mark Granovetter
Evanston, Illinois

Dr. Granovetter, an esteemed sociologist, has inspired fellow researchers with his scholarly work and compelling reasoning. His book, *Getting a Job*, is a classic in the field of social stratification, and his 1985 article, "Economic Action and Social Structure: The Problem on Embeddedness," reinvigorated economic sociology. Dr. Granovetter is director of the Program in Business Institutions within the Department of Sociology at Northwestern University.

Dr. Bevra H. Hahn
Los Angeles, California

Dr. Hahn—an outstanding researcher, clinician, and teacher—has made contributions to understanding the origins and development of a form of the skin disease lupus and to improving the treatment of patients with rheumatic diseases. She is chief of the Division of Rheumatology and a professor of medicine in the Department of Medicine at the University of California at Los Angeles School of Medicine.

Dr. Peter S. Harper
Cardiff, Wales

Dr. Harper is a renowned researcher of myotonic dystrophy, Huntington's chorea, and other hereditary neuromuscular diseases. He has applied the science of genetics to the delivery of effective and compassionate health care for birth defects and hereditary disorders. Dr. Harper is professor of medical genetics at the University of Wales College of Medicine, and consultant physician and medical geneticist at the University Hospital of Wales.

Dr. Charles R. Hatcher Jr.
Atlanta, Georgia

Dr. Hatcher has had a distinguished career at Emory University. He established and developed the nationally renowned open heart surgery program at the Emory University School of Medicine, serving as professor of surgery and chief of cardiothoracic surgery. In 1976, he became the director of the Emory Clinic, and since 1984 has been the vice president for health affairs and the director of the Robert W. Woodruff Health Sciences Center.

Dr. Harrison Latta
Los Angeles, California

Dr. Latta is internationally recognized as a pathologist and academician. He is an authority on the kidney and a pioneer investigator of the structure of a small, intertwined mass of capillaries called glomerulus. His interest in electron microscopy led to the discovery of the glass knife technique for cutting ultrathin sections, a major contribution in the field. Dr. Latta is professor emeritus of pathology at the University of California at Los Angeles School of Medicine.

Dr. Marie Clare McCormick
Boston, Massachusetts

Dr. McCormick is an acclaimed researcher and policy analyst in maternal and child health services. Her interests are epidemiology of infant mortality and low birth weight, measurement of and factors associated with child health status, and evaluation of maternal and child health services. Dr. McCormick is professor and chair of the Department of Maternal and Child Health at the Harvard School of Public Health and professor of pediatrics at the Harvard Medical School.

Dr. Abraham M.Y. Nomura
Honolulu, Hawaii

Dr. Nomura, a researcher in cancer epidemiology, has focused on the relationship of diet and cancer, and on related methodological issues. He has studied the interaction of genetic factors and behavioral lifestyle patterns that Hawaii represents in its admixture of races and people. Dr. Nomura, director of the Japan-Hawaii Cancer Study at Kuakini Medical Center, is associate editor of the American Journal of Epidemiology and Cancer Epidemiology, Biomarkers & Prevention.

Dr. Stephen J. Peroutka
Menlo Park, California

Dr. Peroutka, a molecular neuroscientist and neurologist, has made significant contributions with direct clinical impact. He was the first researcher to clarify the subtypes of receptors for the neurotransmitter serotonin, explaining the actions of anti-migraine and anti-nausea drugs. He is president and founder of Spectra Biomedical Inc., where genomic techniques are used to identify the causes and treatment of headache and psychiatric diseases.

Dr. Eijiro Satoyoshi
Tokyo, Japan

Dr. Satoyoshi is a distinguished clinician and investigator in the field of neurology. He conceived, developed and directed the Japanese National Institute of Neurosciences, which has been consolidated as the National Center of Neurology and Psychiatry. As president emeritus of this government institute, he continues to be involved in world-class research in a variety of areas of neuroscience.

HONORARY DEGREE CITATIONS

Her Majesty Queen Sirikit of Thailand

for the Degree of Doctor of Humane Letters

May 25, 1995

The people of Thailand have been enriched by Your and His Majesty's efforts on their behalf. For more than four decades as their queen, Your Majesty has — with grace and humility — established and shepherded efforts to shelter the homeless, feed the hungry, nurture the ill and dignify the downtrodden.

As president of the Thai Red Cross Society and honorary president of the Council of Social Welfare of Thailand, you have overseen campaigns that have saved and improved the lives of impoverished citizens. Your establishment of a foundation promoting indigenous cottage industries has, as you intended, earned supplemental income for impoverished farmers. But just as importantly,

the foundation has helped revive traditional forms of artistic expression, preserving a near-extinct aspect of Thai culture.

In recent years, you have also given your gracious attention to grave environmental concerns, and have effectively counseled and encouraged your people to take steps to curb deforestation and improve water resource management.

Together with His Majesty, you have, to paraphrase the royal Oath of Ascension, reigned with righteousness for the benefit of the Siamese people.

Your Majesty Queen Sirikit, for a lifetime of spirited humanitarianism and devotion to your beloved homeland, The Johns Hopkins University is proud to confer upon you the degree of Doctor of Humane Letters, *honoris causa*.

Your life is a lesson on the power of dreams. You grew up on a peasant farm in Korea, working back-breaking 16-hour days, shouldering the weight of your family's expectations that you one day would replace your father at the plow.

But you believed your destiny was elsewhere. As a teenager, with nothing more than the faded shirt on your back, you left and walked to Seoul, more than 100 miles away. There, you took a job delivering rice by bicycle. By age 33, you ran a successful auto repair shop. It was then you established the Hyundai Engineering & Construction Company, the cornerstone of what has become the Hyundai Group. Even amid the turmoil of the Korean War, you were able to make it the most powerful construction company in Korea.

From there, you led Korea into a new economic age. You expanded into trading, shipbuilding, metals, electronics and automobiles. You were the first South Korean invited to establish business relations with Moscow and Pyongyang. Today, in many industries, it is Hyundai that represents Korea in the international market.

Chung, Ju Yung, in recognition of a fearless determination that has been a driving force in the birth of Korea's modern economy, The Johns Hopkins University is proud to confer upon you the degree of Doctor of Humane Letters, *honoris causa*.

One of the nation's great nursing careers began right here in 1927, when you graduated from Johns Hopkins Hospital's School of Nursing and became a head nurse on its wards.

Before long, you were director of the U.S. Cadet Nurse Corps, a crash program to recruit and train nurses desperately needed at the battle front — and on the home front — during World War II. Your effort, it was later said, did even more: It brought nursing into the mainstream of American life.

From that point, you recorded a succession of firsts. Among them: first chief nurse officer of the U.S. Public Health Service, first woman assistant surgeon general, first nurse elected to the Institute of Medicine of the American Academy of Sciences.

In your writing and teaching, you strive to promote the view that nursing is more than just a profession; it's an instrument for social change.

In that regard, you offered advice when Johns Hopkins re-established its School of Nursing as a university division in 1984. Make the curriculum as broad as possible, you said, and then count on nurses "to keep the human element in its proper relative position."

Lucile Petry Leone, in recognition of your extraordinary accomplishment in and dedication to the profession of nursing, The Johns Hopkins University is proud to confer upon you the degree of Doctor of Humane Letters, *honoris causa*.

You have opened doors that will never close again. You are the first Democratic woman elected to the Senate in her own right, and the first to serve in both houses of Congress. You are also the first woman to hold statewide office in Maryland.

As a young social worker, you began your public career building a coalition of communities that stopped a highway project from slicing your Baltimore neighborhood in half.

Today, you are equally at home in the Bethlehem shipyards and the halls of Congress. A tireless advocate for the elderly, you sponsored legislation to keep spouses solvent when their partners went into nursing homes; it has lifted more than a million couples out of poverty.

Your zeal for community service and volunteerism is reflected in the creation of a national service program. With equal vigor, you have championed the rights of women, fought for workers and their jobs, and helped provide state-of-the-art medical care for veterans.

Barbara Mikulski, for a career dedicated to preserving both lives and quality of life, and for achieving national leadership without ever losing sight of Maryland and its people, The Johns Hopkins University is proud to confer upon you the degree of Doctor of Humane Letters, *honoris causa*.

Yours is a career many students would hope to emulate. For more than 30 years, you have been prominent in American television journalism, earning the respect and admiration not only of your viewers, but of your peers as well.

As anchor, since its inception, of the ABC News program "Nightline," you have created one of the most trusted news sources on the air. You are its managing editor, the driving force behind in-depth, focused reporting on major news stories each night. By bringing to bear intense research, reporting, and interviewing, you provide your viewers with a clear, unbiased understanding of domestic issues and world events.

You have earned every major broadcasting award many times over, including 23 of television's Emmy Awards. The Society of Professional Journalists has twice honored you with the Sigma Delta Chi Award, its highest tribute for public service.

Ted Koppel, in recognition of your dedication to informing and educating millions of viewers through fair and honest journalism, The Johns Hopkins University is proud to confer upon you the degree of Doctor of Humane Letters, honoris causa.

THE UNIVERSITY MACE

The University Mace carried by the Chief Marshal, Dr. Milton Cummings, Jr., was first used at the 1954 Commemoration Day Exercises. Eight symbols are hand wrought in sterling silver on an ebony staff. The symbols represent our cultural development from ancient times, through the Middle Ages and the Renaissance, to the modern era.

THE PRESIDENTIAL INSIGNIA

University President William C. Richardson is wearing the Presidential Insignia signifying the authority vested in the President by the Board of Trustees. It is a chain of sterling silver links worn around the neck. Portraits of each of the eleven Johns Hopkins University Presidents are engraved on the faces of eleven of the links. On the reverse are engraved the names and dates of office of each President. Five blank links for future use are included. The University Seal completes the design.

ACADEMIC DRESS

The custom of wearing academic dress stems from the Middle Ages, when scholars were also clerics and wore the costume of their monastic order. The hood was originally a cowl attached to the gown, which could be slipped over the head for warmth. The cap was originally round, but has changed to the varieties that we see today.

The gown varies for the respective degrees. The Bachelor's gown is worn closed and can be distinguished by its long, pointed sleeves. The Master's gown is designed to be open with the arms worn through the slits in the elbows of the sleeves. The Doctor's gown, also worn open, has full, bell-shaped sleeves with three horizontal bars stitched across the upper arm. There is a velvet panel draped around the neck and stitched down the front edges. This velvet trimming may be either black or the same color as the velvet border of the hood.

The hood also varies for the respective degrees. The Bachelor's and Master's hoods are of the same design, pointed at the base. The Bachelor's hood is three feet long; the Master's hood is three and one half feet long. The Doctor's hood is four feet long, of fuller shape and rounded at the base.

The hood is bordered with velvet, the color of which indicates the field of study in which the bachelor's, master's, or doctoral degree was earned:

Dark blue - Philosophy
Light blue - Education
Green - Medicine
Salmon pink - Public Health
Orange - Engineering
Gold-yellow - Science

White - Arts and Letters
Pink - Music
Purple - Laws
Apricot - Nursing
Tan - Business

The silk lining of the hood represents the institution which granted the degree. If more than one degree is held, the gown and hood of the higher or highest degree is worn. The Johns Hopkins University has adopted an alternative costume to be used by all holding Johns Hopkins doctoral degrees, both earned and honorary. The costume consists of a gold robe with front and side panels in sable velvet and a six-sided Dutch academic cap with gold sweatband and tassel. The linings seen in today's academic procession may include:

Black, old gold chevron-Johns Hopkins

Light blue, white chevron-Columbia

Dark blue-Yale

Blue with white chevron-Duke

Dark blue, two orange chevrons-Illinois

Light blue, two white chevrons-North Carolina

Old gold, maroon chevron-Minnesota

Old gold-Iowa

Gold, blue chevron-University of California at Berkeley

Gold-Virginia

Purple, gold chevron-Northwestern

Carnegie Tartan - Carnegie-Mellon

Purple-New York University

Bright red-Wisconsin

Plum, with scarlet-London

Maroon-Chicago

Crimson-Harvard

Carmelian, two white chevrons-Cornell

Cardinal-Stanford

Cardinal red and gray-Massachusetts Institute of Technology

Red, tri-Chevron in center-Heidelberg

Dandelion yellow-Michigan

Maize, azure blue chevron-Sorbonne

Yellow and white-Rochester

HONOR SOCIETIES

Phi Beta Kappa

Phi Beta Kappa is the nation's oldest and most prestigious undergraduates honors organization. To gain election students must have excelled in a broad array of undergraduate courses in the arts and sciences offered at one of the 249 colleges and universities in the United States that are sufficiently rigorous and intellectually challenging to shelter a Phi Beta Kappa chapter, which was founded at the College of William and Mary in 1776. The Hopkins chapter was founded in 1895.
